## *Revealing future callings*

What if, like the small Amazonian hummingbird, small efforts made by everyone could succeed in changing the world?

The message of our new game, inspired by a native American legend, is more than just a philosophical idea - it's a message of hope. To build a better and more sustainable world and each of us can make "small contributions" that can change it for the better!

Consuming products designed for long lasting use, prolonged durability via refills, consuming products that are less harmful to the environment and (when it comes to games) products that create bonds and precious shared moments.

At Sentosphère, we've been faithful to this way of creating products for all of the 35 years and we now approach our "third generation" of young creators. You can't imagine how wonderful it is for us to meet parents who tell us of the "great" childhood moments they've experienced and are now passing onto their own children, by sharing the same great games. From smelling the Loto des Odeurs capsules, creating vivid colours with Aquarellum, to making candles, perfumes, soaps...

It doesn't matter whether today's children are familiar with digital tablets or mobile phones, from an early age –the feedback we get is that they're just as happy to carry out sensory or cosmetic experiments to understand how things are done, and just as curious to discover creative trades they may want to make their own tomorrow.

More than ever, we're proud that our products have helped our customers find themselves (both philosophically and career wise) and we're grateful for every story from young adults who tell us how much our products have helped shape those life choices.

It's a powerful incentive to keep moving forward!

As ever, we are committed to producing our games as close as possible to our consumers from our factories in France. Thus, some 237 items from our catalogue are made in France, compared to just 34 products of multiple origins. 22 of the items in our modelling clay range are not made in France, as are the diamond pieces from the Art & Creation range and our jewellery boxes.

We wish you all a wonderful year, filled with fun!

Véronique Debroise

# TopScent

Author: Véronique Debroise

Topscent is a fun game during which reflexes, concentration and olfaction challenge you!

Equally deal the cards. The players sit in a circle and must smell the same aroma diffuser without revealing their answer to the other players. The dice is thrown, the game starts.

Each player draws the first card of his deck clockwise. Once the recognised fruit or vegetable appears the number of times indicated on the dice, top the cards and win the stack! Be careful, those who are mistaken are eliminated until the end of the round.

The winner is the one with the most cards at the end of the game.

Help the hummingbird save the rainforest from fire and flame!

Carefully listening to the forest sounds on the mobile app, and using an animal's paw, players will have to pass on precious rain drops to help extinguish the fires, as well as seeds to help with the rejuvenation of the rainforest. However, putting out the fire won't be so easy! Between the raging thunderstorm, whose lightning frightens the animals, to the jaguar prowling through the trees, you'll need to be extra vigilant!

This immersive cooperative game combines skill, reflexes and strong values, such as solidarity and mutual aid, that will delight all the family!

The game offers a fun and inclusive method to learn letters in different ways.

Starting from 3 years old, children will be able to discover the alphabet, braille and sign language!

To do so, children will turn into explorers that need to find the hidden animals in the landscape illustrated on the board through different challenges like writing the letter on a black board, recognizing the letter with the sense of touch, signing the letter or making the letter's sound. If the challenge is successful, the animal can be placed on the board!

Little by little, with each added animal, the alphabet will be brought to life thanks to this fun educational game.

# VOYAGE Olfactif

Author: Véronique Debroise,  
Arnaud Pincemaille and Philippe Attali

This game will make you travel without leaving your house! You will be able to go around the world in 31 smells from the Marrakech souks to the Polynesian beaches without forgetting to stop by the pyramids in Egypt!

During this collaborative game, each player will have to make the others guess their travel picture with the help of smells that can recall its geographic location, its colour or even what it basically represents.

This game presents 70 travel pictures taken across the world along with 30 smells. Some associations are easy to make, like the smell of lavender for a Provence landscape in France. But other times, players will have to get creative because the smells of leather, algae or lemongrass are not always associated with the same ideas depending on the players.

With this olfactory trip, get ready to live some fabulous sensory adventures with your family or friends.

# Aquarellum®

The Aquarellum range will help artists of all ages and levels discover the pleasures of watercolour painting and colour mixing all the while creating true masterpieces! This painting technique will allow all ages to easily create beautiful works of art thanks to:

- Highly qualitative, thick vellum paper, perfect for watercolour painting as the paper will not crinkle.
- Illustrations with masked outlines that will magically appear at each brush stroke. They will keep the paint from adhering to the masked surfaces.
- Watercolour inks that mix perfectly and that can be overlaid to create beautiful gradients.
- A detailed instruction sheet on the perception and the mixture of colours.
- A made in France concept.

This is the perfect arts & crafts activity to initiate young children to the art of painting and mixing colours, all the while awakening their sense of concentration. The result is guaranteed to encourage artists of all levels and ages in their creative process.

# Aquarellum 3D!

The Aquarellum 3D collection is taking the magic to the next level since children will be able to literally bring their works of art to life by turning them into 3D animated figurines!

After having enjoyed a fun and creative painting activity, children can scan their paintings with a mobile app (IOS and Android compatible) that will animate their own colouring! They will also be able to interact with their creation and even take pictures or selfies with it! Young artists will have fun collecting all the different figurines in the app's digital gallery showing their own personalized and animated versions!

This fun kit will gather a traditional painting technique with the digital world, adding a fun twist to an already magical creative activity. Children will be able to fully play, interact and proudly share their own creations!

The "Aquarellum 3D" application (french language only) can be downloaded free of charge from the Playstore (Android) or the AppStore (IOS). Find out how to use it by flashing the QR Code below:

PHOSPHO

Thanks to its phosphorescent masked outline, children will be able to carry out with the same ease as with a classic white masked outline, the colouring of their painting. The palette of 7 basic colours, as intense as they are bright, will allow them to create wonderful shades that will highlight the drawing. After a few minutes under a halogen or in the sun, the contours of their painting will illuminate in the darkness or at night.

Ideal to fall asleep between mermaids, unicorns or in the universe of galaxies to make beautiful dreams.

Concept'box

4+

For the past 15 years, Sablimage has helped young children easily create intricate pieces of art with sand. All it needed now was to find a way to frame the created sand boards!

Sentosphère therefore designed the Concept'box: a zero-waste packaging solution that turns into a frame and that has been rewarded with the 2021 LSA INNOVATION AWARD in the "Packaging Trend" category.

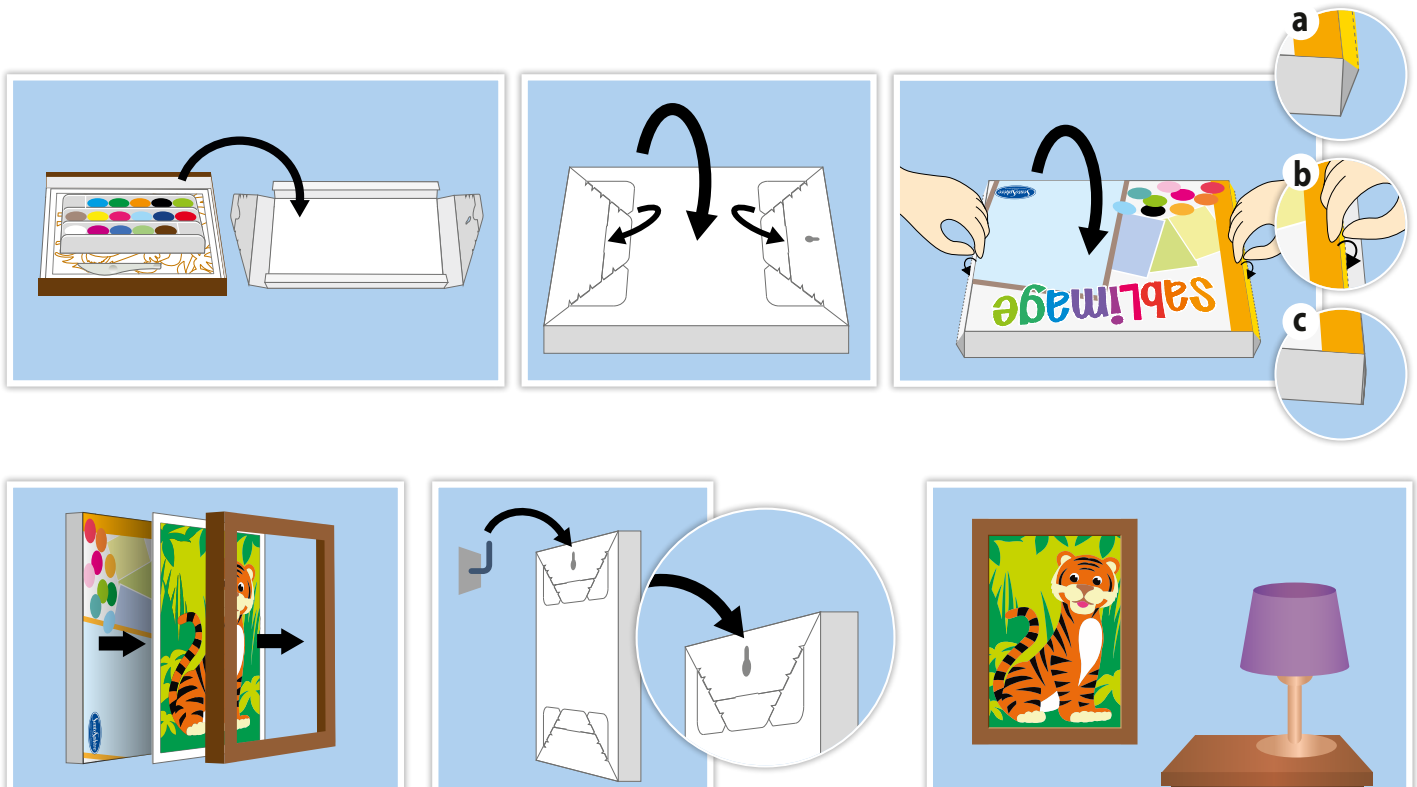

Playing is good, doing it responsibly is better! The Concept'box allows Sentosphère to benefit even more from the Sablimage technique, while better respecting the planet because it is:

- The box turns into a frame to enhance the sand art boards made with each kit. The packaging therefore takes a full part in the provided creative activity.
- The packaging is glued to guarantee the inviolability of its content, all the while avoiding the use of plastic wrap.
- As for the rest of our kits, the box uses recycled cardboard and is FSC certified.

This new range therefore allows to enjoy the famous Sablimage technique with a more sustainable approach. Making sand art is now a creative activity that can be as fun as it is eco-friendly!

## THE PACKAGING BECOMES A FRAME:

The Concept'Box's has a very positive environmental impact: This box is 24% lighter which helps save 5 tonnes of cardboard each year. Shipping a lighter box helps save 5,185 kg CO<sub>2</sub> (emissions in CO<sub>2</sub> equivalent) annually. As this box can be turned into a frame, it is not to be recycled or thrown away and this helps save 17 tonnes of waste each year!

La pâte à modeler  
révolutionnaire

Patarev is the modelling clay that all parents have always dreamed of! It does not stain nor does it stick to fingers, clothes or tables. It also bounces, is scented, can be rehydrated, and the colours mix perfectly to make a wide range of bright colours. Its light and elastic texture is delightfully handled and encourages creativity at any age.

Each box contains 2 puzzles to help stimulate children's development. They can start by separating the jigsaw pieces into two sets, by turning them over, observing the pattern on the back and separating them based on that. Then they can move on to assembling the puzzles. This activity will help them awaken their sense of observation, concentration, memory and logic.

Both designs are complementary: "Living in the countryside/Living in the city", "North American animals/African animals", "In the woods/In the branches".
